Inaugural Public Policy Council Appointed

The ESOP Association's Board of Directors is proud to announce the inaugural members of its Public Policy Council (PPC), led by Executive Committee Chair Peter Ney of EA Engineering and eight other members of the of the Executive Committee.

The ESOP Association's Public Policy Council is a volunteer group of advocacy champions representing highly engaged TEA member companies, professionals, and individual employee-owner volunteers.

The PPC is charged with helping shape and guide the public policy initiatives and advocacy activities of TEA. The expansion of TEA to include this new council is part of TEA's trend of growth in recent years, not only in membership but also in its advocacy efforts, new headquarters and expanded member services.

For more information and to see the PPC members, [visit our website](#).
